

SMOKE and TOBACCO ODOURS:

To completely remove the odour, NokOut must come into direct contact with the problem

IMPORTANT: Always do a patch test to check for colour fastness. OdorTECH cannot be responsible for any issues of discolouration, fading, etc. May cause fading if exposed to direct sunlight before fully dry.

SHAKE BOTTLE WELL BEFORE USING:

GENERAL INSTRUCTIONS: Do a thorough application of **NokOut** and then a good wiping of the surfaces that have been repeatedly exposed to smoke. This will help remove residual nicotine and tar which harbour odours. Do another application of **NokOut** after cleaning the surfaces and leave the product to dry.

SMOKER'S ROOM: Add 250 ml of **NokOut** to 4 litres of water and place in a cold vaporizer. Operate the vaporizer in the room as needed (up to 4 hours at a time). This will work well in any area with airborne odour problems.

CURTAINS: Spray curtains with a fine mist of **NokOut**.

FURNITURE: Spray the furniture with a fine mist of **NokOut**. Remember to get behind, and under the cushions.

CLOSETS and CUPBOARDS: Remove the contents from the closet and spray the interior of the unit with **NokOut**.

CLOTHING: **NokOut** can be added to your laundry: add 125 ml of **NokOut** to your wash cycle to eliminate smoking or other stubborn odours. Do not use a detergent with fragrance.

COUNTERS/FLOORS/WALLS: For best results, fog the entire area regularly. Otherwise, spray or wash the area with a solution of 250 ml of **NokOut** to 4 litres of water.

Smoke and tobacco odours are tough; you may need more than one application.

NokOut works as it dries so let it dry thoroughly!
