

CAT CARE:

To completely remove the odour, **NokOut** must come into direct contact with the problem.

NokOut can be sprayed directly on to your cat's coat and massaged into their fur for immediate odour removal. Be careful around the face and eye area. **IMPORTANT:** We recommend using an Elizabethan Collar while the product is wet. Cats have a sensitive digestive system and should not ingest large quantities of **NokOut**.

Cat got skunked – see our “**HOW TO DE-SKUNK AN ANIMAL**” sheet.

IMPORTANT: Always do a patch test to check for colour fastness. OdorTECH cannot be responsible for any issues of discolouration, fading, etc. May cause fading if exposed to direct sunlight before fully dry.

SHAKE BOTTLE WELL BEFORE USING:

LITTER BOXES:

- Spray the bottom of an empty, clean litter box liberally with **NokOut**.
- Allow the product to dry and repeat until there is no odour in the plastic itself.
- Fill the box with litter and lightly spray the top of the litter with **NokOut**.
- Once or twice a day, clean the litter and do a light spray of **NokOut** onto the litter.

NokOut has a residual effect – it continues to fight odours long after it has dried. **NokOut** will extend the life of your cat litter because the litter box will remain cleaner for longer than if you didn't use **NokOut**, and no odours will disturb your cat.

BEDDING: **NokOut** can be sprayed directly onto your cat's bedding to remove odours.

NokOut works as it dries so let it dry thoroughly!

BATH TIME:

- Spray **NokOut** directly on your pet's coat.
- Rub into the skin to eliminate body odours.
- Add 250 ml of **NokOut** to 4 litres of bath water or use as a final rinse additive.

Try **NokOut Pet Shampoo**, a deep cleaning pH balanced formulation for all skin types. It is an excellent all purpose cleansing and deodorizing shampoo, and is soothing and healing to sensitive skin.
