

## **DOG CARE:**

---

To completely remove the odour, NokOut must come into direct contact with the problem

NokOut can be sprayed directly on to your dog's coat and massaged into their fur for immediate odour removal. Be careful around the face and eye area.

**Dog got skunked – see our “HOW TO DE-SKUNK AN ANIMAL” sheet.**

**IMPORTANT:** Always do a patch test to check for colour fastness. OdorTECH cannot be responsible for any issues of discolouration, fading, etc. May cause fading if exposed to direct sunlight before fully dry.

### **SHAKE BOTTLE WELL BEFORE USING:**

#### **KENNELS:**

Add 175 – 250 ml of **NokOut** to 4 litres of water and mop or wipe down the kennel area. You can also spray or fog a fine mist over the entire area and let dry – **NokOut** will provide up to 24 hours of residual odour control. When spraying, ensure that all areas are covered.

#### **BEDDING:**

**NokOut** can be sprayed directly onto your dog's bedding to remove odours.

**NokOut works as it dries so let it dry thoroughly!**

#### **BATH TIME:**

- Spray **NokOut** directly on your pet's coat.
- Rub into the skin to eliminate body odours.
- Add 250 ml of **NokOut** to 4 litres of bath water or use as a final rinse additive.

Try **NokOut Pet Shampoo**, a deep cleaning pH balanced formulation for all skin types. It is an excellent all purpose cleansing and deodorizing shampoo, and is soothing and healing to sensitive skin.
