

HOUSEHOLD USES:

To completely remove the odour, **NokOut** must come into direct contact with the problem

IMPORTANT: Always do a patch test to check for colour fastness. OdorTECH cannot be responsible for any issues of discolouration, fading, etc. May cause fading if exposed to direct sunlight before fully dry.

SHAKE BOTTLE WELL BEFORE USING:

AIR BORNE ODOURS (such as perfume, smoke and cooking smells): Spray **NokOut** directly into the air. For larger areas (family rooms, garages, kitchens, etc), or to eliminate musty odours in your air conditioner or ducts, spray the air filters with **NokOut** and/or use a fogging machine routinely (about every 10 days). You can also add a solution of 125 ml of **NokOut** to 4 litres of water directly into your humidifier to provide results in a larger area.

URINE/DIARRHEA/VOMIT/BLOOD: Spray the air, and then spray the problem. Clean up the problem and spray the air again. For blood: use water to completely remove blood from the area prior to applying **NokOut**.

TOYS and SHARED SURFACES: Spray **NokOut** directly onto the item/surface or wash it in a cleaning solution of 125 ml of **NokOut** to 4 litres of water.

DIAPER PAILS/TRASH CANS: Spray the container liberally with **NokOut** and repeat as necessary.

COUNTERS/FLOORS/WALLS: For best results, fog the entire area regularly. Otherwise, spray or wash the area with a solution of 125 ml of **NokOut** to 4 litres of water.

KITCHEN ODOURS (onions, garlic, fish, etc): Spray your hands, cutting boards and knives.

GARBAGE DISPOSALS: Pour **NokOut** directly into the disposal.

MICROWAVES and OVENS: Spray the surface directly with **NokOut**.

LAUNDRY: Add 175 - 250 ml of **NokOut** to each load of laundry. Do not use a detergent with fragrance. You can also spray **NokOut** directly on to your clothing to eliminate odours. See our Laundry sheet for specific instructions.

BEDDING: Fog or spray the area before bedding is in place.

SHOES/GYM BAGS/LOCKERS: Remove insole and liberally spray insole and inside of shoes and bags; allow to dry thoroughly. Spray or wipe the inside of the locker.
