

SPORTS: HOCKEY, SOCCER, RINGETTE, BASEBALL, SKATING, etc

To completely remove the odour, NokOut must come into direct contact with the problem

IMPORTANT: Always do a patch test to check for colour fastness. OdorTECH cannot be responsible for any issues of discolouration, fading, etc. May cause fading if exposed to direct sunlight before fully dry.

SHAKE BOTTLE WELL BEFORE USING. Always carry a bottle of **NokOut** in your equipment bag and spray your equipment down after every game or practice.

WASHABLE EQUIPMENT: If the equipment is washable, put it in the machine and add 175 – 250 ml of **NokOut** to the wash or rinse cycle. Do NOT use a detergent with fragrance. See our Laundry sheet for specific instructions.

In between washings, jerseys and clothing can be lightly sprayed with **NokOut** to keep offensive odours at bay.

NON-WASHABLE EQUIPMENT: If equipment is not washable, spray it liberally with **NokOut** and let it air dry. You may need to repeat this step if the equipment is older and has been accumulating odour for a prolonged period of time.

GYM BAGS: Remove all contents from your gym bag, wipe down each piece with a clean cloth and then spray each piece with **NokOut** at full strength.

GLOVES: Gloves are particularly hard to deodorize since **NokOut** must come into contact with the source of the odour to eliminate it. Spray **NokOut** generously inside the fingers and wrists. Also spray the outside of the glove and allow to air dry. **NokOut** is completely non-toxic so you can apply it liberally to your hands and then work the product into the gloves manually to ensure you reach the tip of the fingers.

HELMETS: Spray the inside of the helmet after each use and allow to air dry.

SKATES/FOOTWEAR: Skates and other footwear should be sprayed liberally with **NokOut** after each use. Pay special attention to the toe area and tongue of the boot or shoe. If the insole is removable, take it out and treat both sides. Once sprayed, let it air dry.

NokOut must dry completely in order for it to work. If your gear/apparel is badly soiled, it may require more than one application.

NokOut works as it dries so let it dry thoroughly!
