

VETERINARY CLINIC USES:

To completely remove the odour, **NokOut** must come into direct contact with the problem

IMPORTANT: Always do a patch test to check for colour fastness. OdorTECH cannot be responsible for any issues of discolouration, fading, etc. May cause fading if exposed to direct sunlight before fully dry.

SHAKE BOTTLE WELL BEFORE USING:

AIR BORNE ODOURS: For urine, stool, kennel, perfumes, pet odours (diseased skin, teeth etc.) simply spray **NokOut** into the air or disperse via a cold atomizer at a dilution of 250 ml to 4 litres of water. For larger areas, or to eliminate musty air conditioner and duct odours, spray the air filters until moist (but not wet) and let fan circulate the air. Repeat as needed. Adding 250 ml of **NokOut** to 4 litres of water in a humidifier will also provide wonderful results.

URINE, DIARRHEA, VOMIT, BLOOD: Spray the problem with **NokOut** at full strength, completely remove the blood or other substances from the area then rinse with cold water. Apply **NokOut** directly to the clean surfaces.

ANAL GLANDS: Empty the glands on to a paper towel that has been soaked with **NokOut**. Spray the rectal area liberally with **NokOut** and wipe dry. The pet will go home odour free.

PET ODOURS: **NokOut** is non-toxic, hypo-allergenic, biodegradable and unscented and will not irritate the skin of dogs or cats. The pet can be sprayed liberally to eliminate any unwanted animal odours (including skunk). **Remember - always protect the eyes.**

LITTER BOXES: Remove solids and spray litter box daily with **NokOut**. This helps with "finicky" cats that don't like a dirty litter box.

SKUNKED PETS: Refer to our "How to De-Skunk an Animal" sheet for full instructions.

TABLE, CAGE, STALL CLEANER: Spray, wipe or mop **NokOut** directly on the surfaces to remove odour causing agents.

TRASH CANS: Liberally spray **NokOut** into the trash container, allow to air dry.

CLOTHING and LAUNDRY: Spray **NokOut** directly on clothing to eliminate odours caused by accidents as they occur (anal glands, urine, stool, etc.). Add 175 - 250 ml of **NokOut** per load of laundry or rinse cycle. Do not use a detergent with fragrance. See our Laundry sheet for specific instructions.

FLOORS, COUNTERS, WALLS: For residual odour control throughout the office, spray, mop, and wash all hard surfaces with a solution of 250 ml of **NokOut** to 4 litres of water,

BEDDING: Fog or spray the area with **NokOut** before the bedding is in place. Launder bedding as per instructions above.

NokOut works as it dries so let it dry thoroughly!
